

# SO YOUR CHILD NEEDS A PECTUS BRACE

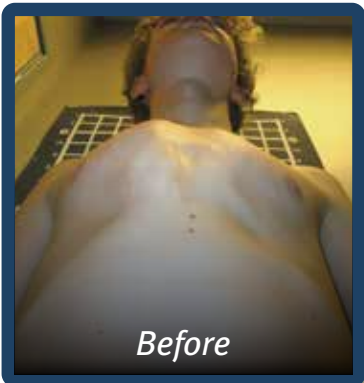

Your healthcare provider has diagnosed your child with a chest defect called pectus carinatum and prescribed non-surgical treatment with bracing and exercise. Don't worry, Pectus Services is here to help.

Our Utah location treats patients in the Salt Lake Valley and all across Utah, in addition to Idaho, Nevada and Colorado.

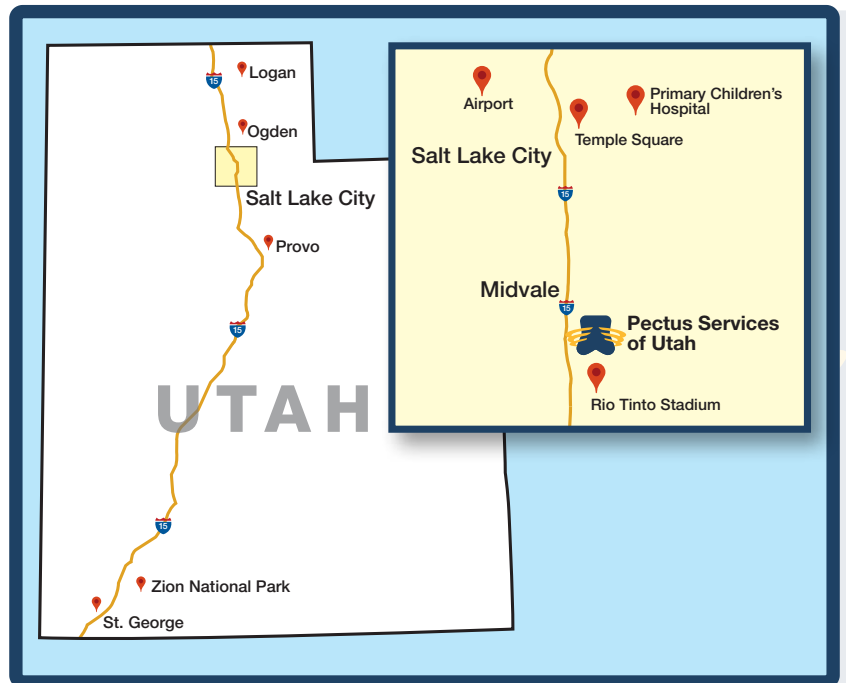

Since 1996, the T-Joe has been the pectus brace of choice for many doctors and hospitals throughout the world, resulting in nearly 6,000 successful outcomes, from the most mild pectus defects to the most severe and asymmetric.

Since becoming the first ever FDA Registered Medical Device for the non-surgical treatment of pectus carinatum in the United States and CE marked for Europe, the T-Joe has improved chest deformities in boys, girls, teens, and young adults.

Our Utah Pectus Improvement Center is conveniently located in Midvale, just off Interstate 15 and only minutes from downtown Salt Lake City. This Center includes 2 exam rooms, a fully equipped brace workshop, 3D Chest Scanner, exercise area and comfortable waiting room. There is no charge for a consultation.

## UTAH'S MOST SUCCESSFUL BRACE SINCE 2006

# FEATURES OF THE T-JOE PECTUS BRACING SYSTEM

**Proven:** 25 years, nearly 6,000 successful outcomes, 14 countries....and growing.

**No restrictions:** Full participation in gym class, perfect for active kids, and can be used for most sports.

**Hygienic:** The T-Joe is the only pectus brace with washable covers for good hygiene and improved comfort.

**Female friendly:** The ONLY pectus brace with a version specifically designed for females, and it even comes in pink or purple!

**Water brace:** The T-Joe comes in a water-proof version for swimmers, surfers or summertime fun!

**Quick wearing schedule:** On average most kids wear the T-Joe Brace for 4 weeks of full-time wear then slowly wean off to bedtime only.

**Precision Technology:** Unlike an X-ray or CT, our in-office 3D Pectus Scan uses no radiation and results in a precision fit, fully customized brace for your child.

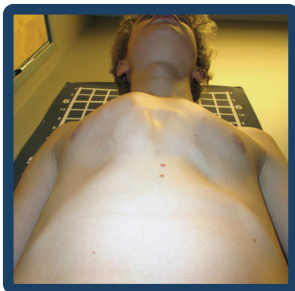

**Designed for comfort:** With super soft padding the T-Joe Pectus Brace is comfortable to wear for the best patient compliance as compared to other braces.

**Nearly invisible:** Low profile design makes it hard to see.

**Support:** Patients receive an Informational Folder with complete instructions. During the bracing period we provide 2 years of check-up appointments (either in-office or via telehealth) and additional 3D scans to track progress at no additional cost.

## Why Choose The T-Joe Brace?

IT WORKS! Standing alone as the first pectus brace in the USA and proven by over 25 years of successful outcomes when compared to other braces.
